

RUNEHUNTER SCENE PROMPTS

Generate these in ChatGPT (image mode), then drop the files into our chat. **I wire them into the tour:** each stop becomes a full-screen painting the page glides through, flavor scenes fill the sections between stops, and the interface chrome, minimap and menus stay on top. The live-rendered world stays underneath, so the console brag stays true. Real plugin screenshots beat AI every time; swap them in the moment you have them.

RULES THAT MAKE IT LOOK LIKE ONE WORLD

- **Paste the STYLE BLOCK at the start of every prompt.** Same words = same world.
- **One conversation, one reference.** ChatGPT has no seeds, so the reference image is the seed: attach your favorite render to every later prompt and say *match this exact style*.
- **Camera never changes:** slightly elevated three-quarter view, like a tabletop diorama seen from a low drone. Level horizon. Angled or tilted shots break the set.
- **The hunter appears in every STOP.** Knee-high creatures only read as knee-high next to a person. Flavor scenes may skip him.
- **Aspect:** 16:9 for every scene · 1:1 for creature portraits. Pick the largest size offered; aim for 2000px wide or upscale after.
- **Name files exactly as listed** so they slot straight in.
- **If the tool balks at a game name,** delete the name and keep the description. The look lives in the words, not the name.

STYLE BLOCK — PASTE FIRST, EVERY TIME

Stylized fantasy game key art, low-poly-inspired but hand-painted, chunky faceted geometry, warm golden-hour sunlight, long soft shadows, muted medieval palette: mossy green grass, grey castle stone, cobalt blue banners, dusty paths, gentle haze at the horizon, slightly elevated three-quarter camera like a miniature diorama, crisp silhouettes, warm rim light, cozy adventurous mood, high production splash-art quality –

Negative: photorealism, text, letters, logo, watermark, game UI, modern clothing, anime, neon oversaturation, fisheye, tilted camera

THE HUNTER (paste when a card says + HUNTER): a small adventurer in a leaf-green hooded cloak with a leather satchel, holding a glowing amber orb the size of an apple

THE STOPS

LUMBRIDGE STOP + HUNTER · 16:9

art-lumbridge.jpg

...a grey stone castle with a tall keep, cobalt banners down the walls and three rooftop flags, beside a lazy river with a stone bridge, willow and oak trees; peeking out from behind the near corner tower, a knee-high hunched undead warrior in dark plate armor, two-horned helm, oversized greataxe, comically small; the hunter stands on the dirt path, orb ready

MISTHALIN FIELDS FLAVOR · 16:9

art-misthalin.jpg

...open farmland, wooden fences, a windmill on the rise, morning light; standing proudly in the middle of the path, one knee-high chicken, absolutely not hiding; wildflowers, long shadows

MORYTANIA STOP + HUNTER · 16:9

art-morytania.jpg

...black bog under thin fog, dead trees, a mossy stone crypt, sickly green marsh light kept painterly; half-hidden behind a leaning gravestone, a knee-high spectral demon, swept-back horns, glowing red eye slits, long claw arms, smoke instead of legs; the hunter wades in, orb glowing brighter

THE WILDERNESS STOP + HUNTER

· 16:9

art-wild.jpg

...scorched grey-brown waste, cracked earth, a ruined obelisk, old bones in the dirt, brooding sky with warm light breaking through; on a rock outcrop, a knee-high green dragon, folded wings, chin raised; the hunter approaches low and careful

KARAMJA STOP + HUNTER · 16:9

art-karamja.jpg

...black basalt volcano slope, thin glowing lava veins, drifting embers; on a basalt shelf, a knee-high crimson beast, wide and low, tan underbelly, stubby legs, huge tan horns sweeping back, lit mouth, ankle-height menace; the hunter shields his eyes from the glow

FREMENNICK / UNGAEL STOP + HUNTER · 16:9

art-fremennick.jpg

...blue-white ice shelf, pale arctic light, drifting snow, dark sea behind; asleep on the ice, a knee-high pale undead dragon, bone spikes along the spine, faint acid-green glow at the eyes; the hunter tiptoes past his own long shadow

THE COMPANION FLAVOR · 16:9

art-companion.jpg

...a cobbled market street in a medieval fantasy city at dusk, lanterns coming on, market stalls closing; a hunter walks away from camera, and trotting at his heel like a loyal dog, a knee-high crimson horned beast; passersby doing double takes

THE BATTLE FLAVOR · 16:9

art-battle.jpg

...a grassy hilltop at night under stars; the hunter and a knee-high spectral demon face off in the blue dark, and above the hunter glows a small protective sigil like a shield of light; tense but playful, fireflies

TROPHY ROOM FLAVOR · 16:9

art-trophy.jpg

...a cozy wooden study by candlelight, shelves floor to ceiling; on the shelves, tiny living creatures doze under glass display bells: a chicken, a green dragon, a horned crimson beast, a pale ice dragon; one bell stands empty with a small brass plaque

SEND-OFF SUNSET FINALE · 16:9

art-sunset.jpg

West Texas has nothing on this one: wide fantasy river valley at sunset seen from a hill, castle silhouette far below, enormous orange-to-indigo sky, first stars; on the road, two tiny silhouettes walking home: a hunter, and something knee-high trotting beside him (if the sky fights the style block, drop the interior words and keep the palette)

CREATURE PORTRAITS (FOR THE ROSTER AND LOG)

Square, 1:1. Style block first, then: *full body, centered, three-quarter view, isolated on a plain flat very dark brown background, soft ground shadow, nothing else in frame*, then the creature line:

- `portrait-dharok.png` knee-high hunched undead warrior, dark plate, two-horned helm, oversized greataxe
- `portrait-chicken.png` one extremely ordinary knee-high chicken, standing proud
- `portrait-abyssal.png` knee-high spectral demon, swept horns, red eye slits, claw arms, smoke below the waist
- `portrait-dragon.png` knee-high green dragon, folded wings, chin high, very pleased with itself
- `portrait-jad.png` knee-high crimson beast, wide and low, tan horns swept back, lit mouth
- `portrait-vorkath.png` knee-high pale undead dragon, bone spikes, faint green eye glow, half asleep

Real screenshots (the upgrade): two hard-cropped in-game screenshots of the actual plugin beat every image on this page. Crop out display name, chatbox, friends list and XP drops. They replace art the moment they exist.

These scenes depict RuneHunter's own fan-made miniatures. If a prompt gets declined, drop the proper noun and rerun; the descriptions are written to work without any names at all.
